

## **FIFRA Section 24(c) Supplemental Label RIMON<sup>®</sup> 0.83EC Insecticide**

### **FOR DISTRIBUTION AND USE ONLY WITHIN THE STATE OF MONTANA**

**EPA Reg. No. 66222-35-400**

**MT SLN No. MT- 060002**

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA-registered label.

#### **DIRECTIONS FOR USE**

##### **Ground Application**

Apply recommended dosage by conventional ground sprayer equipment capable of delivering sufficient water to obtain thorough, uniform coverage of the target crop. Spray equipment boom and nozzles should be oriented in a manner to minimize boom height to optimize coverage uniformity, maximize deposition and reduce spray drift. Drop nozzles may be required to obtain uniform coverage against certain pests that develop down in the canopy. A minimum spray volume of 5 gallons per acre should be used with ground spray equipment. Higher gallonages will provide better coverage and performance. Use hollow cone, disc-core hollow cone or twin jet fan nozzles suitable for insecticide spraying.

##### **Aerial Application**

For aerial application apply in a total of at least 10 gallons per acre using a nozzle configuration that will provide a median droplet size of 200-300 microns. Higher gallonages will provide better coverage and performance. Observe the minimum safe application height – not greater than 12 feet above crop canopy. Boom length must be less than 75% of wing span and swath markers, flagging or GPS system should be used during application. Applications should be made when wind speed is between 2 and 10 mph. Do not make applications when wind speed exceeds 10 mph. Under low humidity and high temperatures, spray volume should be adjusted upward to compensate for evaporation of spray droplets. Ultra Low Volume (ULV) application is not permitted.

## INSECTS CONTROLLED BY RIMON 0.83EC IN ALFALFA SEED

Target Pests	Application Rates Fl. Oz. Per Acre	Application Timing
Lygus bugs	9 - 12	Begin application when plant bugs appear and oviposition is initiated. Repeat at 7 to 14 day intervals as needed to maintain control. Rimon will not control adults.
Alfalfa weevil (suppression)	6 - 9	If later instars, or adults are present, or if a quick knockdown is required, tankmix with a knockdown insecticide at the lower rate of 6 to 9 oz. per acre.  Use higher rates and higher spray volumes when foliage canopy is dense and high infestations occur. For the most effective control, fields should be scouted.

001

### Restrictions/Precautions:

- Do not apply more than 48 oz. per acre per season.
- Do not apply more than 4 applications per season against Lygus.
- Read and follow directions of tank mix partners to ensure accurate use directions and avoid detrimental effects on pollinators since some of the knockdown insecticides can negatively impact pollinator conservation.
- Do not apply within 14 days of harvest.
- Do not apply this product through any type of irrigation system.
- Do not apply within 100 feet by ground and 250 feet by air equipment of bodies of water such as lakes, reservoirs, rivers, permanent streams, natural ponds, marshes or estuaries. All applications must include a 25 foot vegetative buffer strip within the buffer zone to decrease runoff.
- Do not use hay from treated alfalfa for animal feed or forage.
- All alfalfa seed screenings shall be disposed of in such a way that they cannot be distributed or used for human food or animal feed. Do not use harvested seed for sprouting. No portion of the alfalfa seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes. Alfalfa seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed. Alfalfa seed may not be distributed for human consumption or animal seed.

**This label for RIMON 0.83EC expires and must not be distributed or used in accordance with this SLN registration after December 31, 2010.**
